

At-Home Ways to Determine Your Ring Size

The best way to ensure you get your accurate size is always to be measured in person by a professional jeweler. Visit us any time and let us help!

Using a Ring You Own

1. Print this guide and make sure **page scaling is set to 100%**.
2. Place your ring over the circles to the right.
3. Match the **inside of your ring** to the circle nearest in size. The measurements listed refer to the **inside diameter** of the ring.
4. If the ring happens to fall in between two sizes, it is recommended to order the larger size.

Things to consider:

- The wider the band, the tighter a ring may feel. You may need to go up a half size.
- This guide serves as a reference, for more accurate results you may also measure your finger by following the instructions below.

Using a string

You can measure your ring size using either string or, perhaps a more common item in your home, floss.

Tips for Measuring Your Finger:

- The best time to measure your finger is in the evening so that your ring will be comfortable after a typical day of activity.
 - Make sure your hand isn't too warm. You want to get an accurate ring sizing, so make sure your hands aren't swollen when you are determining your ring size.
1. Take one of the measurement tools listed above and snugly wrap it around your finger. It shouldn't be too loose, but also not too tight.
 2. Mark where the string or floss first overlaps with a pen.
 3. Line the string or floss up with a ruler and take down its length in millimeters.
 4. Choose the closest measurement on the chart below to find your ring size.
 5. Any ring wider than 6mm go up 1/3 of a size larger.

Measurements in Millimeters

44.2	45.5	46.8	48	49.3	50.6	51.8	53.1	54.4	55.7	56.9
3	3.5	4	4.5	5	5.5	6	6.5	7	7.5	8

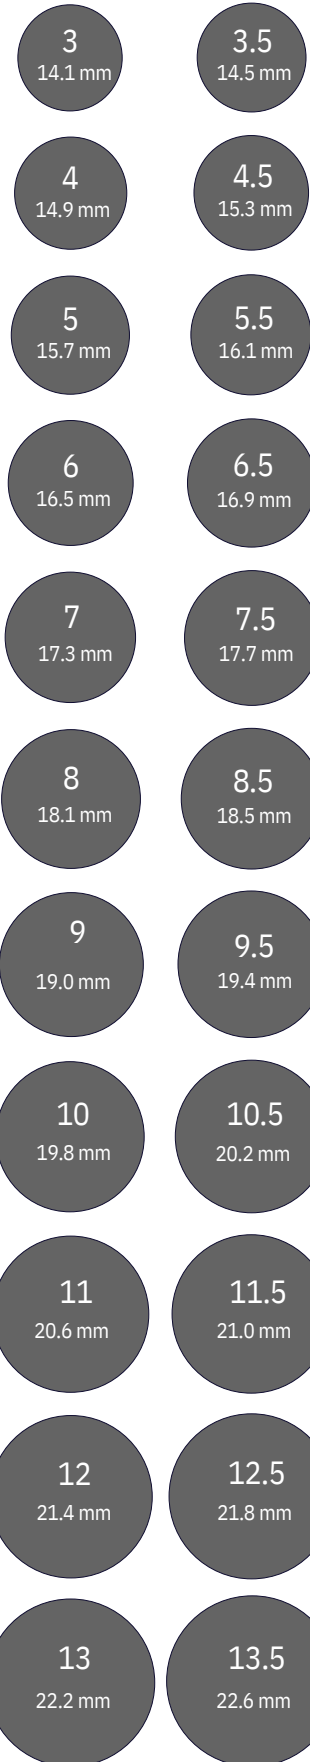

58.2	59.5	60.8	62.1	63.3	64.6	65.9	67.2	68.4	69.7	71.0
8.5	9	9.5	10	10.5	11	11.5	12	12.5	13	13.5

This size guide does not guarantee an accurate size.

To ensure an accurate size, we recommend you be measured by a professional jeweler.
